Godwin Formwork Solutions

SUBORDINATED DEBT & EQUITY

PROVIDED BY

FIVE POINTS CAPITAL

Godwin Formwork Solutions, Inc., (“Godwin” or the “Company”) designs, rents, and sells complex concrete formwork equipment and systems throughout the Midwest and Southwest U.S. markets. In addition to providing infrastructure-focused concrete formwork and shoring equipment, the Company is differentiated in the industry by its in-house technical design expertise and on-site erecting and dismantling services. Godwin’s extensive experience with infrastructure projects – including retrofit, replacement, and new construction – as well as its comprehensive equipment base, has given the Company a leading competitive edge across several infrastructure sectors, including water and wastewater treatment, renewable energy, transportation, and industrial facilities.

Five Points provided subordinated debt financing and equity to support Stonebridge Partners' recapitalization of Godwin.
