Based in Nashua, New Hampshire, Resonetics is a leading provider of laser micromachining solutions to the healthcare and life sciences industries. With a particular focus on polymers, Resonetics supports its customers with a prototyping and process development center along with a team of more than 30 engineers and scientists. The company has 50 laser workstations of various technologies that can create features as small as one micron—a fraction of a human hair—in a scalable and reproducible manner.
