March 2013

Envest Private Equity has acquired BBTCP's equity ownership stake in Service Center Metals ("SCM"). SCM had previously repaid BBTCP's subordinated debt investment via a senior debt recapitalization. BBTCP had been an investor in SCM since September 2006.

SCM produces high quality aluminum extrusion products for the service center industry. The Company operates two state-of-the-art presses and employs approximately 70 production workers within a 150,000 square foot facility in Prince George, VA. Beginning production in August 2003, SCM steadily increased its production volume and quickly became the industry's most efficient, low-cost producer of aluminum rods, bars, tubes, pipes and shapes, combining high-quality products with strong customer service and support.
