## CAPITAL

SEPTEMBER  
2020

Executive Information Systems (“EIS”) supports software developers and manufacturing partners’ sales and marketing efforts to government customers by providing outbound and inside sales, business development, contract management, and back office functions. EIS holds a GSA Schedule contract and serves as the federal channel partner for the SAS Institute, offering the complete line of software products, maintenance and services. In addition to federal customers, EIS assists SAS in its state and local business, as well as prime contractors targeting public sector end users.

Five Points Capital provided unitranche debt and an equity co-investment to support the acquisition of EIS by CCP Capital Strategies.
